

STRATEGY SESSION AT FERMILAB

June 27, 1990

Talking Points

1. Summary (by John Peoples) of current Fermilab status relative to the Map of the Universe project
 - (a) perspective personally
 - (b) what does Fermilab want to do, and why?
 - (c) what are the next steps for Fermilab?
 - (d) identify any possible problems—can we help in any way?
2. Time lines
 - (a) how fast does Fermilab want to proceed?—can we help?
 - (b) time scale for other aspects of the project at U. Chicago, IAS, Princeton U.
3. Possible scope of Fermilab involvement
 - (a) data acquisition and storage
 - (b) contributions to making the archive—operations
 - (c) maintaining the living archive
 - (d) creating and providing interactive and graphic display software
4. How should role of Fermilab be discussed?
 - (a) how should Fermilab contribution be handled?
 - (b) when can/should Fermilab contribution be made?
 - (c) what kind of recognition and credit should Fermilab receive?
5. How can we “contract for a deliverable” with an institution that is contributing as a member of the project?—What do we need in writing?
6. Other point arising.
