

How to use Desktop On-Call

Remote operation of the system is achieved using Desktop On-Call (Sorry, this software is only Japanese.) This software is running on web base. JavaScript is necessary to operate of DTOC.

DTOC

Step 1: Set up your computer

Open IE or FireFox, input IP address on it and to connecting the host computer at the Science museum, Tokyo. <http://202.241.69.50/>

Step 2: Login Desktop On-Call

ID and Password are required (Ask to Kaoru)

A new window appears when you are succeeded login

Step 3: Login Host PC

ID and Password are required to login to the Host PC again (Ask to Kaoru)

It is Science museum PC so that you can mostly see Japanese character on it

All program icons go to programs on the remote computer - not yours!

Step 4: After login to the Host PC

Each user can access when you reserved observation time. You can't operate a telescope except for your observing time from CATS-i.

Step 5: Operation KIT

Double click the E_Client.exe of KIT

See: KIT operation check list

http://atlas.riken.jp/kit/OPRFHS2004/KIT_Operation.html

Step 6: End of session

Log off 『kit-user』

Close DTOC session
